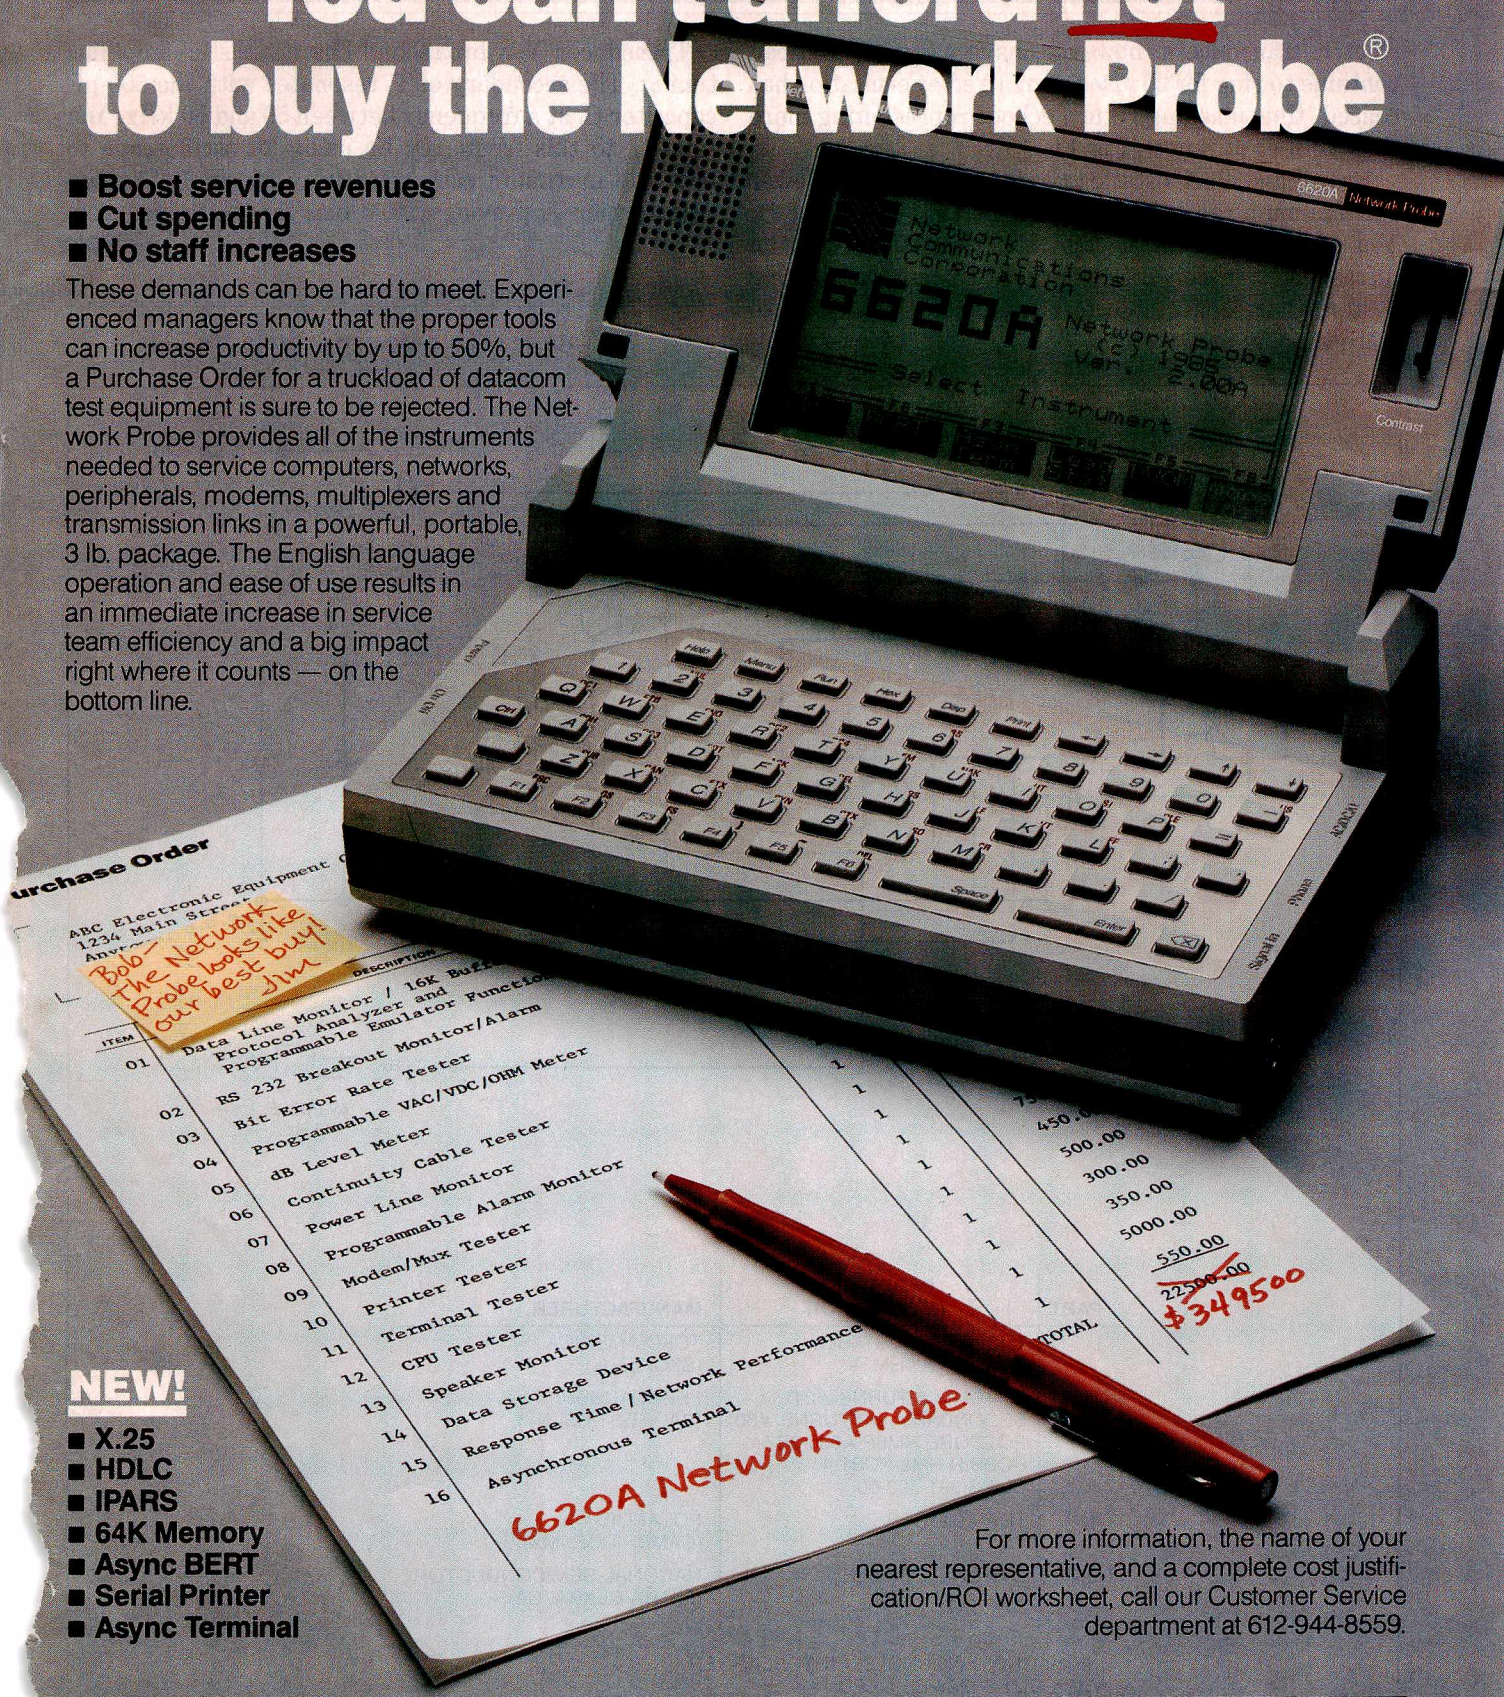
You can't afford not to buy the Network Probe®

- **Boost service revenues**
- **Cut spending**
- **No staff increases**

These demands can be hard to meet. Experienced managers know that the proper tools can increase productivity by up to 50%, but a Purchase Order for a truckload of datacom test equipment is sure to be rejected. The Network Probe provides all of the instruments needed to service computers, networks, peripherals, modems, multiplexers and transmission links in a powerful, portable, 3 lb. package. The English language operation and ease of use results in an immediate increase in service team efficiency and a big impact right where it counts — on the bottom line.



NEW!

- **X.25**
- **HDLC**
- **IPARS**
- **64K Memory**
- **Async BERT**
- **Serial Printer**
- **Async Terminal**
